SUMMARY

I am a Frontend Engineer with around **4 years of experience building AI, ERP, and B2B web applications**. I work primarily with **React.js, Next.js, and TypeScript** to create scalable and reliable user interfaces. I have been involved in frontend architecture, mentoring team members, and coordinating frontend work for the reconciliation project, including sprint planning and task assignments, while working closely with backend and product teams.

EXPERIENCE

11/2024 - Present

Bangalore, India

- **React Developer**

BASOFA Consulting Pvt Ltd - Microsoft Certified Partner

- Architected frontend business flows for **ERP-PSP financial reconciliation**, supporting manual and automated rule driven workflows.
- Designed reconciliation as the primary execution flow and **re-architected legacy React/Next.js** loading using module isolation and deferring non-critical features.
- Built an **AI-powered reconciliation assistant** as a standalone React/Next.js capability with asynchronous initialization.
- Implemented real-time, user-specific **AI response streaming using SignalR (pub/sub)**, ensuring strict data isolation per user.
- Developed custom B2B functionality on **Microsoft D365 E-Commerce** leveraging the React SDK, Site-builder and platform APIs.
- Took ownership of **frontend architecture and delivery** across finance, AI, and commerce projects, working closely with backend and product teams.
- Mentored engineers** and enforced code quality through consistent reviews and frontend best practices.
- Coordinated frontend work for the reconciliation project, **supporting sprint planning and task allocation**.

04/2023 - 11/2024

Bangalore, India

- **Frontend Engineer**

Aarabhya Systems Pvt Ltd

- Built a React/Next.js B2B application with **hierarchical user roles, permissions, and data-driven dashboards**.
- Delivered production-critical performance and stability fixes in legacy-heavy frontend systems.
- Refactored core UI layers and upgraded dependencies to improve maintainability.
- Built real-time, data-driven interfaces and supported teams through mentoring and technical guidance.

06/2022 - 02/2023

Bangalore, India

- **Software Engineer**

Nviera Technologies Pvt Ltd

- Contributed to frontend development and feature implementation for internal and client-facing applications.
